

VIGON INTERNATIONAL, INC. BWA WATERSHED STEWARD

Vigon International, located in East Stroudsburg is BWA's first ever Watershed Steward, with a \$3,000 donation to support BWA's mission. Vigon has a strong commitment to environmental sustainability through sustainable business practices and support for community organizations such as BWA.

Vigon's president Steve Somers says, "BWA's work to protect and improve the water resources and environment in our community perfectly aligns with the mission of Vigon. Vigon is committed to sustainable use of our natural resources not only in our local community but around the globe where we ensure our customers and suppliers adopt similar commitments. It is ultimately our goal to achieve minimal impact on the land, water, and air in the process of creating sustaining and enduring value for our customers, suppliers, and most importantly our employees operating always as an environmentally sensitive and good citizen of the world."

This year, Vigon issued its first Sustainability Report, documenting changes made at the company's facilities to reduce water, electricity, and energy consumption and reduce waste produced. You can read about Vigon's commitment to the environment at www.vigon.com/sustainability/.

BWA is proud to recognize Vigon International as a partner in protecting the water resources and environment of the Brodhead Watershed.

Vigon reps Mary Nicoletto, Bill Blake, Heather Fox and Denise Acosta-Rivera joined BWA members and friends at our annual Celebration on September 30
