

All have Commending West

CAPACITY—Pocono Manor Inn accommodates two hundred guests. In plan and equipment it is new and thoroughly modern. It has steam heat, electric light, passenger elevator, hot and cold water, and thirty private and public bathrooms. The management is in experienced and expands, and the table is unusually excellent.

Pocono Manor Cottago standa about two hundred yards cast of the Inn, on the sheltered slope leading down to Lake Minausin. It commands a fine view of the Swiftwater and Paradise Valleys. It is heated throughout, and has complete kitchen and dining-soom arrangements, making it suitable for independent use when the Inn is closed.

ROADS AND AUTOMOBILES—Of the forty miles lying between Pocono Inn. and Wilkes Barre, the State Highway Department has recently converted the castern half into a beautiful parkway. As this passes through Pocono Summit, Naoral Pines, Pocono Pines Assembly, Pocono Luke, Stoddartaville and Bear Creek, it offers rare opposituations for automobiling, driving and riding. The trip from Philadeliphia to Pocono Manor by automobile is

Social Hall-Manor Conage

one of the most delightful in this part of the country, and is becoming yearly more popular. One of the most charm, ing routes is that by Bethlehem and through the famous Wind Gap, renowned for its beauty of scenery. The route by way of the Delaware Water Gap is also a favorite.

Ample accommodations for automobiles, carriages and horses are provided at the Inn garage and stables at reasonable rates.

AMUSEMENTS—Lake Minausin and the Swiftwater are well stocked with brook trout, and the fishing in the lake and the pools of the stream above is reserved for guests and cottagers. The other streams of the Pocono region are also famous for trout fishing.

A well-appointed nine-hole golf course, laid out by II. II. Barker, of Garden City, I. I., is maintained on the Manor property. The course, among the highest in the essurer portion of the United States, embodies a pleasing variety through its conformity to the roll mountain sides,

Pocono Streams

The Pocono Mountain Region of Pennsylvania is well known for its many scenic trout streams. From the historic Brodhead Creek water shed to the big waters of the Lehigh River, The Rod and Gun Club guides know them all. These are the rivers on which we work and play on a regular basis. With our local knowledge and many years of experience you are bound to have unique experience on our favorite waters. Year round fishing is available, but the best fishing and hatches occur from mid April to the end of June.

Enjoy walk and wade opportunities on small creeks or large freestone rivers throughout the Poconos. There are over a dozen streams, creeks and rivers within a 45 minute drive from Pocono Manor with good populations of wild and stocked trout.

Lehigh River

The Lehigh River is one of the up and coming rivers on the east coast. This once polluted river is now filled with good sized stocked and holdover trout. From the Francis Walter Dam near White Haven, down stream to the Delaware River the Lehigh has proven to be a great fishery with a diverse population of insects and forage fish. The trout and small mouth bass in this river grow fast and feed well and provide a great fight in the deep pools and fast runs.

The Lehigh is one of the few river where a drift boat can be used and is sometimes necessary to properly fish the river. Our guides have fished the Lehigl for many years and know its waters well Drift trips are available from April to October and are available for 1 or anglers. Walk/Wade fishing is available for confident waders.

Regional Water Management Program Manager 2 Public Square Wilkes- Barre, PA 18711-0790

re: NPDES Permit PAS 10S042 Lackawanna County Rail Authority Pennsylvania Bulletin Vol. 26, Number 23, June 8, 1996

Dear Regional Manager,

The above mentioned application for the discharge of storm water by the applicant, and the proposed construction and ultimate discharge of collected storm water from this proposed site by the applicant has caused alarm to the residents and guests of Pocono Manor.

The direct flow of storm water and any subsequent controlled discharges from this site and the proposed intensive industrial applications which are proposed to be staged from this site cause serious concern to Pocono Manor Inn and the residential community of Pocono Manor who are served and have been served by Kettle Springs and it's waters since the early 1900's.

Having recently been nominated to the National Register of Historic Places as an Historic District, Pocono Manor's water source via Kettle Springs is a direct recipient of the waters from this site. The discharge from the construction storm water and the potential for pollutant's from the proposed operations pose potential serious peril for those who have historically depended on the water resource of Kettle Springs.

The present site with it's impervious surface has been the direct contributor to the erosion and scaring of our adjacent property. This flow is spilling into the head water of Indian Run which has it's point of origin on our property and empties into our Kettle Springs.

"Designated Historic District"

Several years ago Kettle Springs tested positive to containing traces of toxins consistent with those discovered on the adjacent property to the site of discussion. It's contamination caused it to be deemed a **Super Fund Clean Up Site** and has been monitored since that time

This proposed site presently causes serious erosion to the adjoining property which is owned and operated by Ireland Hotels d/b/a Pocono Manor Inn & Golf Resort. The historic facts surrounding the effects of water emitting from this area and site, and it's potential to threaten the water resource and the quality of life of the Community of Pocono Manor causes serious concerns to it's population.

I respectfully request that a public hearing be held and an opportunity be granted to have input from those directly effect by this proposed discharge.

Sincerely,

James Ireland

President Ireland Hotels
